

Media Recovery

Media Recovery Services

Description:

Media Recovery is a digital camera data recovery software that revives accidentally deleted or defected photos and video files

Features:

1. Free Preview

- The downloadable demo version allows users to preview recoverable photos and movies in media

2. Offer as an ASP (Application Service Provider)

- Users can access Media Recovery , and recover their media at anytime, anywhere over Internet with daily use fee

3. Risk-free

- Original media data is intact. Recovery does not overwrite photos and movies to recover

4. Easy-to-Use GUI

- Anyone can scan recoverable images and have them repaired by simple and convenient screens
